DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: The specification contains terms that appear to be translational errors. For example page 2, line 23, the term “fictitious force” has no clear meaning. Also the term “rock position” on page 4, is unclear as to what position is being referenced. Appropriate correction is required.

The abstract of the disclosure is objected to because it contains legal phraseology, e.g. “means”. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re claim 1, in line 2, the recitation “for second stitch” is indefinite since a first stitch has not been claimed. In line 15, the recitation “wherein they are provided the stitch cam comprising” is confusing.

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 2-5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
